

Requirements Handling/Gap Analysis

Need of Requirements Handling and Gap Analysis

Proper Preparation

Problem understanding

Understanding the needs and constraints of system stakeholders

Understanding the customer better

Helps in Delivery estimation

Benefits of the Requirements Handling for a Project Manager and the Customer

- ❖ It defines the project scope.
- ❖ It provides the basis for plan charter, work-load, dependencies, etc.
- ❖ It provides client a satisfaction as this setups a base of first response to the customer.
- ❖ Better analysis available on customer's requirements.
- ❖ It defines functional and non-functional requirement and serves as an input to all other documents created in later stages of development/deployment.
- ❖ It eliminates any confusion or misunderstanding on initial stage.
- ❖ It reduces development effort.
- ❖ It makes testing easier.
- ❖ It reduces the chances of requirement creep, unwanted delays.
